72%	Of dentists in Georgia do not accept Medicaid or PeachCare	Evaluation	\$18.16	\$43.44
Georgia ranks 14 th out of the 16 southern states in the percent of dentists accepting Medicaid or PeachCare		Fluoride	\$17.59 ³	\$35.10
		Sealants (per tooth)	\$22.35	\$48.17
Transportation		Language		
On average, Medicaid/CHIP eligible children have to travel 15 more miles for dental care than their non-Medicaid peers		Medicaid patients are required by federal law to have access to translation services arranged for and paid for by the provider		
59%	Of Georgia's counties are at high risk for health transportation barriers	38% Of dental schools in the US report that students were not adequately prepared to manage Limited English Proficient patients		

¹ DMO: Dental Maintenance Organization

² Average private insurance payments for the South Atlantic region

³ Average fee-for-service payment for fluoride varnish used, as average DMO payment not available for this service.

Benefits of Improved Dental Health

Improved health outcomes

Link between poor oral health and:

- Trouble eating and speaking
- Diabetes
- Pain
- Pre-term low birth weight

Cost savings for kids, families, and the state

- Reduction of future dental visits and related costs
- One study found that preventive dental care could save Georgia \$51.1 million annually in Medicaid costs

Improved education and life outcomes

- Improved attendance
- Improved academic performance
- Improved self-esteem and employability
- Reduced pain and suffering

Policy Recommendations

Increase dental workforce in shortage areas throughout Georgia by:

- Authorizing dental hygienists to practice in expanded settings such as schools and nursing homes

Incentivize and increase Medicaid acceptance rates among dentists by:

- Increasing Medicaid reimbursement rates for dental services like exams, cleanings, fluoride, sealants, and treatment of caries
- Reducing administrative barriers that hinder dentists from accepting Medicaid
